

T&H SENSOR - battery | cod.9.000.078

ezon.io T&H Sensor is a smart sensor that can measure the temperature and humidity levels in an environment.

The battery-powered **ezon.io T&H Sensor temperature and humidity sensor** is designed to be positioned without constraints within an environment.

Thanks to its precision, it reliably detects the temperature and relative humidity, allowing you to maintain total control over the climate of your home.

The battery-powered **ezon.io T&H Sensor** is compatible with all other devices in the Ezon.io system and, combined with the **climate manager** device, allows you to manage the climate automation of your home.

The installation and management of the sensor are immediate and thanks to the **ezon.io app**, you can monitor the device and connect it to voice assistants such as **Amazon Alexa and Google Home** to customize your automation experience.

The sensor is equipped with an advanced chip that offers optimal reactivity.

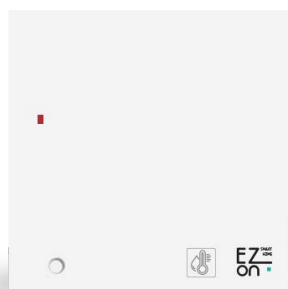

The possibility of remote updating of the control software allows ezon.io to keep your device always updated and performing.

The device in this version is designed to be positioned in the environment without any power connection constraints, so as to measure the temperature and humidity in the optimal point according to your needs. The elegant closing plate makes it a discreet object wherever you place it.

The device works with a rechargeable lithium battery (included) that allows, depending on the frequency of intervention that can be modified via the ezon.io app, a duration of up to 24 months. The battery level can always be viewed via the ezon.io app and charging can be done with a normal 5V USB power supply (accessory not included).

The sensor can be placed on any surface, or mounted on the wall thanks to the wall support, to optimize the monitoring of the temperature and humidity in your home.

In short, the **ezon.io temperature and humidity sensor** represents a new level in home environmental monitoring. With its precision, advanced connectivity and intelligent features, it offers impeccable control and optimal comfort for your home.

|---------------------------------|---------------------------------------|
| Product code: | 9.000.078 |
| Size: | 75mm x 75mm - height 24mm |
| Size with stand (not included): | 75mm x 77mm - height 27mm |
| Operating temperature: | from -40°C to +45°C |
| Operating humidity: | from 0% to 100% relative humidity |
| Battery: | Rechargeable Lithium (included) |
| Connector: | Micro USB Type B (cable not included) |
| Battery charger power supply: | 5V USB (not included) |
| Battery life: | up to 24 months |

MADE IN ITALY

FC RoHS CE

Why choose the Ezon.io temperature and humidity sensor?

The **Ezon.io sensor** is ideal for those who want to accurately monitor indoor climate conditions. Thanks to its compatibility with Alexa and Google Home, it is easy to integrate the device into a home automation system for maximum comfort. With its long battery life and app management, it offers a practical and intelligent solution for environmental control at home.

The ezon.io ecosystem is manageable and programmable with the ezon.io companion APP. Available for free download from App Store and Google Play.

The ezon.io products should not ever be used in any way to manage medical devices or other technical products which are critical for the functioning of lifesaving or supporting systems, cause in the case of failure that may lead to the death or injury of a person. Usage of ezon.io devices in such systems requires the explicit written permission of the Mediatech Srl CEO.
