

CLIMATE MANAGER cod.9.000.079

Product code:	9.000.079
Size:	18 x 39 x 29mm
Relay features:	AC 90V-250V 50/60Hz Max 16A
Supply voltage:	5VDC (use code 9.000.033)

 **MADE IN ITALY**

FC RoHS CE 

ezon.io Climate Manager allows you to manage and monitor your heating in a simple and practical way.

Thanks to the **Ezon.io Smart Home app**, accessible both from home and remotely, you always have the desired and current temperature in the room under control.

You can easily modify or set timed programs, and if you prefer not to use your smartphone, just a voice command is enough to make adjustments.

Installation is quick and does not require masonry work, allowing you to control the heating in any type of home, whether it is an old building or a new construction, whether you use traditional radiators or underfloor heating.

Based on your daily activities, you can program the increase and decrease of the temperature directly from the app and adjust the system even when you are not present, always ensuring ideal comfort. **ezon.io Climate Manager** can be integrated into automation scenarios, so you do not have to worry about a thing.

This device acts as a smart thermostat, allowing you to efficiently manage both heating and cooling, ensuring a comfortable environment based on your preferences. Combined with the temperature and humidity sensor, it offers an optimal experience while maximizing energy efficiency.

ezon.io Climate Manager allows you to:

- Plan daily or weekly schedules based on your habits.
- Control multiple thermostats within the same home or in different homes.
- Intervene remotely via the app to adjust the thermostat (for example, activating the anti-freeze mode), without having to follow a pre-set schedule.
- Manage your heating even by voice, using assistants such as Siri, Google Assistant and Amazon Alexa.
- Activate the geolocation routine with voice assistants, saving energy by turning off the heating when you leave home.

The **ezon.io Climate Manager** module is designed to control heating or cooling systems for boilers with activation contact, district heating with control valve, or 230V combi boilers.

For the correct functioning of the **ezon.io Climate Manager** device (code: 9.000.079), **you need to have an ezon.io temperature and humidity sensor** (code: 9.000.078, 9.000.086, 9.000.087).

The ezon.io ecosystem is manageable and programmable with the ezon.io companion APP. Available for free download from App Store and Google Play.

The ezon.io products should not ever be used in any way to manage medical devices or other technical products which are critical for the functioning of lifesaving or supporting systems, cause in the case of failure that may lead to the death or injury of a person. Usage of ezon.io devices in such systems requires the explicit written permission of the Mediatech Srl CEO.
