

ENERGY MANAGER cod.9.000.005

| | |
|-----------------|---------------------------------|
| Product code: | 9.000.005 |
| Sizes: | 42 x 38 x 22mm |
| Relay features: | AC 90V-250V 50/60Hz Max 16A |
| Supply voltage: | 5VDC (use code 9.000.033) |

 **MADE IN ITALY**

FC RoHS CE 

Ezon.io Energy Manager is an intelligent device designed for the advanced control of your electronic appliances.

Thanks to its small size, it can be easily inserted into the 503 box and connected to the socket you want to control.

After installing it quickly and easily, it starts communicating within the **ezone.io network**, the instantaneous absorption data and consumption statistics.

The **ezone.io Energy Manager** device allows you to detect in real time the energy consumption of the appliance connected to the socket where the device is inserted.

You can thus keep track, in real time, of the consumption of each individual appliance and of all those connected so as to make eco-conscious decisions on the status of your appliances (a very old appliance could make you consume more than necessary without you realizing it) and on the selected operating cycle.

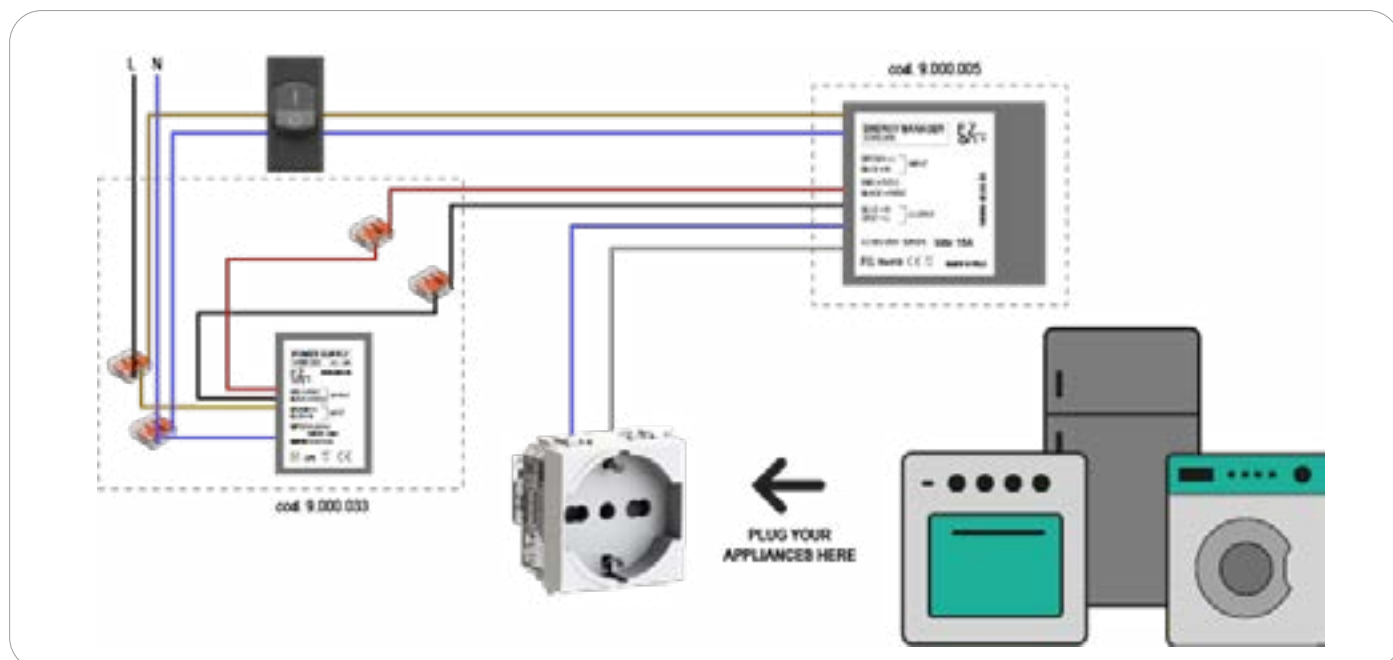

Energy manager meets all safety requirements: overload protection and overtemperature protection. (maximum current: 16 A)

Energy manager will transmit consumption data directly to the **ezone.io Smart Home APP** where you can view them in different modes with just one click.

Furthermore, the **ezone.io Energy Manager** device gives you the ability to manage the automatic disconnection of connected devices so you can say goodbye to annoying blackouts due to exceeding the consumption allowed by your contract.

Thanks to the **ezone.io smart home App**, you can define a priority list for household appliances: ezone.io will manage the disconnection/reconnection of each individual appliance based on your priorities.

Furthermore, if you have the ezone.io mini Hub, you can also consult your consumption remotely or through the Amazon Alexa or Google Home voice assistants.

The ezone.io ecosystem is manageable and programmable with the ezone.io companion APP. Available for free download from App Store and Google Play.

The ezone.io products should not ever be used in any way to manage medical devices or other technical products which are critical for the functioning of lifesaving or supporting systems, cause in the case of failure that may lead to the death or injury of a person. Usage of ezone.io devices in such systems requires the explicit written permission of the Mediatech Srl CEO.
